**Subject:** Re: Lostine Public Safety Project information for tonight's meeting

Hi Sitka-

Thank you so much for the call on the 23rd. I / We truly appreciate (in anticipation) the forthcoming canyon clean up work. After the call, I thought further on the matter of potential exposure that we as land owners have in the event of a catastrophic event, e.g., fire or other, triggered by the Successful Bidder. We have seen it happen before and such an event, an error or just bad luck, will happen again, just hopefully not on this project. As such, I would like the questions of insurance coverage of the Successful Bidder addressed.

I have completed the attached Lostine Public Safety Project Comments to Scoping doc.

Again, thank you so much.

Best of Everything,

Maria

Summary of comments:

In addition to my comments of 2/23 via Skype Conference Call please add to my commentary record the following request:

As landowners, we (Belknap, Peden, Bambe collectively Lapover) are surrounded by and exposed to potentially catastrophic risks associated with work to be performed by the "Successful Bidder" of the USFS Lostine Public Safety Project. We, therefore, request the following:

- The USFS require the Successful Bidder to carry insurance coverage limits appropriate for the scope of the job and related landowner exposures.
- The USFS advise and discuss with Lapover such insurance coverage minimums
- The USFS require the Successful Bidder to provide all Landowners evidence of such coverage
- The USFS require the Success Bidder to individually name each Landowner as an additional insured on the Successful Bidder's E&O and Business Liability insurance policies and that evidence of additional insured be provided prior to commencing any work related to the Lostine Public Safety Project.

This person would like to be contacted about other projects relating to:
